

Sprint Review 3

- Features implemented

The basic sidebar class (with no parameters) was implemented.

The edit tool was added and can select lines.

The line start point placement was implemented.

- Issues fixed

The grid class had to be changed to allow for the new features.

- Implementation review

Will did the majority of the implementation. Michael helped as well.

- Changes made.

- Third iteration of the Sprint Backlog has been completed.
- Kanban board has been updated.
- Use Cases and Models have been updated
- Product Backlog has been updated
- Sequence Diagrams have been made
- User Stories have been implemented

- Plans for next sprint

Stamp toolbar will be implemented, along with the ability to draw lines with left click, a right click to edit the lines, sliders to adjust the volume, and the ability to place additional orbs. Requirements of Deliverable 4 will be fulfilled.

- Scrum Review

Team met for a couple of days spending at least 2 hours per day working on the deliverable. This style has remained to be effective for the project so far. Assignments were given and no problems were encountered while working on said assignments. The Scrum Master was Will Cunningham.
